

DIMENSION TIRE INSTRUCTIONS

Thank you for purchasing a Dimension tire. At Dimension, we believe in producing quality components that allow riders to customize the fit and personality of their bikes for a more comfortable and enjoyable ride.

TIRE INSTRUCTIONS

▲ WARNING: Cycling can be dangerous. Bicycle products should be installed and serviced by a professional mechanic. Never modify your bicycle or accessories. Read and follow all product instructions and warnings including information on the manufacturer's website. Inspect your bicycle before every ride. Always wear a helmet.

▲ WARNING: Tires are a part of your bike that will wear out with use. Tires may pick up foreign objects such as glass or road debris that will puncture the tire and inner tube, causing a loss of air pressure and reduced ability to control or stop the bike, which could lead to a crash resulting in serious injury. Before each ride check to ensure that your tires are in good condition, properly seated on the rim, and properly inflated. Spin each wheel slowly and look for cuts in the tread or sidewall, or excessive wear. Replace damaged or worn tires before riding the bike.

For additional product and safety information go to: www.dimension.com

RIM COMPATIBILITY

Model-specific Dimension tire and rim compatibility chart can be found at www.dimension.com/safety

▲ WARNING: Failure to follow Dimension's compatibility recommendation(s) may result in serious injury.

▲ WARNING: Mounting the wrong size tires can result in the tires contacting the fork or frame when riding. If this happens, you can lose control of your bike, which could lead to a crash resulting in serious injury. A moving wheel can be stopped because the tire touches the fork or frame. Do not mount oversized tires, tires that contact the fork or frame, tires that result in too little clearance, or tires that can contact the fork or frame when the suspension is fully compressed or when riding. Take care that the tires you select are compatible with your bike's fork or frame design. Be sure to follow the manufacturer's recommendations for your front fork and rear shocks. When you are considering tires for your bike take into account that the actual measured size of the inflated tire on your rim may be different than its sidewall marking. Each time you mount a new tire, take the time to inspect the actual clearance between the rotating tire and all parts of the frame.

▲ WARNING: Before every ride check the condition and trueness of the both wheels to ensure that there is adequate clearance between the frame, fork, wheel, tire, and rim. Dimension recommends no less than 4mm tire clearance for ASTM Condition 1 bikes (road) and no less than 6mm for bikes designated as Condition 2 (cyclocross, touring) and above (mountain).

▲ WARNING: Rims that are too narrow with respect to the tire width could adversely affect the tire's stability and possibly cause a tire to roll off the rim, leading to a crash resulting in serious injury. Overly wide rims will change the shape of the tire and ultimately its handling. In addition, wide rims will allow the casing of the tire to stretch beyond the footprint of the tire tread, which exposes the casing to damage.

TIRE PRESSURE

▲ WARNING: Do not inflate tire above the recommended range. Inflation beyond this range may lead to tire or bead failure, resulting in serious injury.

Each tire has a KEEP INFLATED TO pressure range indicated on the sidewall. Never exceed the upper limit of operating pressure. Do not ride on over-inflated or under-inflated tires. Riding on tires improperly inflated for the conditions can result in punctures and dangerous loss of air pressure.

LIMITED 2-YEAR WARRANTY

Dimension products are designed and manufactured for durability and dependability. Dimension products' useful life may be shortened when used in competitive racing and/or beyond their intended use. In those circumstances, warranty claims are at the sole discretion of Dimension.

Dimension warrants this new Dimension product against defects in materials and workmanship for two (2) years from the original date of retail purchase by the consumer. This limited warranty is expressly limited to the repair or replacement of the original product, at the option of Dimension, and is the sole remedy of the warranty. This limited warranty applies only to the original purchaser of the Dimension product and is not transferable.

In no event shall Dimension be liable for any loss, inconvenience or damage, whether direct, incidental or consequential or otherwise resulting from breach of any express or implied warranty or condition of merchantability, fitness for a particular purpose, or otherwise with respect to this product except as set forth herein. This warranty gives the consumer specific legal rights, and those rights and other rights may vary from state to state.

This warranty does not cover the following:

- Damage due to improper assembly or follow-up maintenance or lack of skill, competence or experience of the end user
- Products that have been modified, neglected, used in competition or for commercial purposes, misused or abused, involved in accidents or anything other than normal use
- Damage or deterioration to the surface finish, aesthetics, or appearance of the product
- Normal wear and tear
- Labor required to remove and/or refit and re-adjust the product within the bicycle assembly
- Installation of components, parts, or accessories not originally intended for or compatible with Dimension products

To the extent not prohibited by law, these warranties are exclusive and there are no other express or implied warranties or conditions including warranties or conditions of merchantability and fitness for a particular purpose.
